

## Algebra II Software Table of Contents – 2008-2009

### Unit 1 : Linear Models and Four Quadrant Graphs

1-1 : Graphing with Positive Integer Rates of Change

1-2 : Graphing with Positive Fractional Rates of Change

1-3 : Graphing with Negative Rates of Change

### Unit 2 : Linear Models in General Form

2-1 : Modeling with Linear Inequalities

2-2 : Modeling linear equations in general form

### Unit 3 : Graphs of Linear Equations

3-1 : Graphing linear equations using given method

3-2 : Graphing linear equations using chosen method

### Unit 4 : Absolute Value Equations and Inequalities

4-1 : Solving Simple Absolute Value Equations

4-2 : Solving Absolute Value Equations

4-3 : Solving Simple Absolute Value Inequalities

4-4 : Solving Simple Absolute Value Inequalities with Non-Standard Solutions

4-5 : Solving Absolute Value Inequalities

### Unit 5 : Systems of Linear Equations Modeling B

5-1 : Modeling equations with same sign slopes

5-2 : Modeling equations with opposite sign slopes

## **Unit 6 : Systems of Linear Equations**

6-1 : Solving systems of linear equations by graphing

## **Unit 7 : Graphs of Linear Inequalities**

7-1 : Graphing linear inequalities in two variables

## **Unit 8 : Systems of Linear Inequalities**

8-1 : Solving systems of linear inequalities

## **Unit 9 : Quadratic Models in Factored Form**

9-1 : Modeling area as product of monomial and binomial

9-2 : Modeling area as product of two binomials

9-3 : Maximizing Area

## **Unit 10 : Linear and Quadratic Transformations**

10-1 : Shifting vertically

10-2 : Reflecting and dilating using graphs

10-3 : Shifting horizontally

10-4 : Transformations using tables of values

10-5 : Using Multiple Transformations

## **Unit 11 : Polynomial Multiplication and Factoring**

11-1 : Setting up a Factor Table

11-2 : Multiplying Polynomials using a Factor Table

11-3 : Factoring Trinomials with Positive Constants and Coefficients of One

11-4 : Factoring Trinomials with Negative Constants and Coefficients of One

11-5 : Factoring Trinomials with Positive Constants and Coefficients Other than One

11-6 : Factoring Trinomials with Negative Constants and Coefficients Other than One

11-7 : Factoring using Difference of Squares

11-8 : Factoring Quadratic Expressions

### **Unit 12 : Quadratic Equation Solving using Factoring**

12-1 : Solving Quadratic Equations by Factoring

### **Unit 13 : Forms of Quadratics**

13-1 : Converting Quadratics to General Form

13-2 : Converting Quadratics to Factored Form

13-3 : Converting Quadratics to Vertex Form

### **Unit 14 : Graphs and Equations of Quadratic Functions**

14-1 : Identifying Key Characteristics of a Parabola

14-2 : Transforming Quadratic Functions in Vertex Form

14-3 : Sketching the Graph of a Quadratic Function using Vertex Form

14-4 : Sketching the Graph of a Quadratic Function using Factored Form

14-5 : Writing Quadratic Equations using Vertex

14-6 : Writing Quadratic Equations using X-intercepts

14-7 : Writing Quadratic Equations

### **Unit 15 : Quadratic Equation Solving**

15-1 : Solving Quadratic Equations

### **Unit 16 : Quadratic Models in General Form**

16-1 : Using regression models

16-2 : Modeling projectile motion from ground

16-3 : Modeling projectile motion from above ground

16-4 : Modeling projectile motion

## **Unit 17 : Rational and Irrational Numbers**

17-1 : Creating Number Line Models

17-2 : Ordering Rational and Irrational Numbers

## **Unit 18 : Simplification and Operations with Radicals**

18-1 : Simplifying Radicals

18-2 : Adding and Subtracting radicals

18-3 : Multiplying Radicals

18-4 : Dividing Radicals

## **Unit 19 : Polynomial Operations**

19-1 : Adding polynomials

19-2 : Adding polynomials with higher orders

19-3 : Subtracting polynomials

19-4 : Multiplying Polynomials using a Factor Table

## **Unit 20 : Cubic Models**

20-1 : Modeling volume of cylinders

20-2 : Modeling volume of closed prisms

20-3 : Modeling volume of open prisms

20-4 : Using given cubic models

## **Unit 21 : Product Rule for Exponents**

21-1 : Simplifying expression using the product rule

## **Unit 22 : Quotient Rule for Exponents**

22-1 : Simplifying expressions using the quotient rule

### **Unit 23 : Exponential Modeling**

23-1 : Modeling equations with starting point of one

23-2 : Modeling equations with starting point other than one

23-3 : Using regression models

### **Unit 24 : Linear and Exponential Transformations**

24-1 : Shifting using verbal statements, equations, and graphs

24-2 : Transforming using verbal statements, graphs, and equations

24-3 : Transforming using tables of values

### **Unit 25 : Logarithmic and Exponential Equations**

25-1 : Solving base 10 equations (No Type In)

25-2 : Solving base 10 equations (Type In)

25-3 : Solving base e equations (No Type In)

25-4 : Solving base e equations (Type In)

25-5 : Solving any base equations (No Type In)

25-6 : Solving any base equations (Type In)

25-7 : Solving appreciation and depreciation equations (No Type In)

25-8 : Solving appreciation and depreciation equations (Type In)

### **Unit 26 : Rational Expressions**

26-1 : Simplifying rational expressions

26-2 : Multiplying and dividing rational expressions

26-3 : Adding and subtracting rational expressions

### **Unit 27 : Rational Equations**

27-1 : Solving Rational Equations that Result in Linear Equations

27-2 : Solving Rational Equations that Result in Quadratic Equations

27-3 : Solving Rational Equations with Extraneous Solutions

### **Unit 28 : One-Step Trigonometric Equations**

28-1 : Solving tangent equations (No Type In)

28-2 : Solving tangent equations (Type In)

28-3 : Solving sine and cosine equations (No Type In)

28-4 : Solving sine and cosine equations (Type In)

28-5 : Solving tangent, sine, and cosine equations (No Type In)

28-6 : Solving tangent, sine, and cosine equations (Type In)

### **Unit 29 : Right Triangles and Trigonometric Functions**

29-1 : Finding Side Lengths using a Given Trigonometric Function

29-2 : Finding Side Lengths using One Trigonometric Function

29-3 : Finding Side Lengths using Multiple Trigonometric Functions

### **Unit 30 : Trigonometric Models using Radians**

30-1 : Using given trigonometric function

30-2 : Choosing trigonometric functions

30-3 : Using multiple trigonometric functions

### **Unit 31 : Trigonometric Transformations**

31-1 : Transforming sine and cosine using verbal statements, graphs, and equations

31-2 : Transforming sine and cosine using tables of values

31-3 : Transforming sine, cosine, and tangent using verbal statements, graphs, and equations

31-4 : Transforming sine, cosine, and tangent using tables of values

### **Unit 32 : Trigonometric Equations and Identities**

32-1 : Using double angle, sum and difference identities (No Type In)

32-2 : Using double angle, sum, and difference identities (Type In)

### **Unit 33 : Multiple-Step Trigonometric Equations**

33-1 : Solving equations with Law of Sines (No Type In)

33-2 : Solving equations with Law of Sines (Type In)

33-3 : Solving two-step trigonometric equations (No Type In)

33-4 : Solving two-step trigonometric equations (Type In)

### **Unit 34 : Probability**

34-1 : Finding Simple Probabilities

34-2 : Finding Disjoint Probabilities

34-3 : Finding Theoretical and Experimental Probabilities

34-4 : Finding the Sample Space for Independent Events

34-5 : Finding the Sample Space for Dependent Events

34-6 : Finding the Sample Space for Independent and Dependent Events

34-7 : Finding Compound Probabilities

### **Unit 35 : Measures of Central Tendency**

35-1 : Finding Mean, Median, Mode, and Range

35-2 : Determining Appropriate Measures

35-3 : Measuring the Effects of Changing Data Sets

35-4 : Finding a Data Value Given a Mean
