

Integrated Math I Software Table of Contents – 2009-2010

Unit 1 : Linear Patterns

1-1 : Finding Linear Patterns with Positive Rates of Change

1-2 : Finding Linear Patterns with Positive and Negative Rates of Change

1-3 : Finding Linear Patterns with Negative Starting Points

Unit 2 : Linear Models and First Quadrant Graphs

2-1 : Graphing with Positive Rates of Change

2-2 : Graphing with Positive Rates of Change and Negative Starting Points

2-3 : Graphing with Negative Rates of Change and Positive Starting Points

Unit 3 : Two-Step Linear Equations

3-1 : Solving One-Step Equations (Type In)

3-2 : Solving with Multiplication (No Type In)

3-3 : Solving with Multiplication (Type In)

3-4 : Solving with Division (No Type In)

3-5 : Solving with Division (Type In)

3-6 : Solving with a Variable in the Denominator (No Type In)

3-7 : Solving with a Variable in the Denominator (Type In)

Unit 4 : Linear Models and Independent Variables

4-1 : Finding Independent Variables with Positive Rates of Change

4-2 : Finding Independent Variables with Starting Points

4-3 : Finding Independent Variables with Negative Rates of Change and Starting Points

Unit 5 : Linear Models and Ratios

5-1 : Modeling Linear Functions with Ratios

Unit 6 : Linear Equations with Similar Terms

6-1 : Solving Two-step equations (Type In)

6-2 : Solving by Combining Like Variable Terms and a Constant with Integers (No Type In)

6-3 : Solving by Combining Like Variable Terms and a Constant with Integers (Type In)

6-4 : Solving by Combining Like Variable Terms with Decimals (No Type In)

6-5 : Solving by Combining Like Variable Terms with Decimals (Type In)

6-6 : Solving by Combining Like Variable Terms and a Constant with Decimals (No Type In)

6-7 : Solving by Combining Like Variable Terms and a Constant with Decimals (Type In)

Unit 7 : Linear Models and Four Quadrant Graphs

7-1 : Graphing with Positive Integer Rates of Change

7-2 : Graphing with Positive Fractional Rates of Change

7-3 : Graphing with Negative Rates of Change

Unit 8 : Linear Models and Slope-Intercept Graphs A

8-1 : Graphing given an Integer Slope and Y-intercept

8-2 : Graphing given a Fractional Slope and Y-intercept

Unit 9 : Linear Equations and the Distributive Property

9-1 : Solving Linear Equations (Type In)

9-2 : Using Multiplication and Integers (No Type In)

9-3 : Using Multiplication and Integers (Type In)

9-4 : Using Multiplication and Decimals (No Type In)

9-5 : Using Multiplication and Decimals (Type In)

9-6 : Using Multiplication and Large Decimals (No Type In)

9-7 : Using Multiplication and Large Decimals (Type In)

9-8 : Using Division (No Type In)

9-9 : Using Division (Type In)

9-10 : Using Division with Additional Variable Term (No Type In)

9-11 : Using Division with Additional Variable Term (Type In)

Unit 10 : Linear Models and the Distributive Property

10-1 : Modeling with Integer Rates of Change

10-2 : Modeling with Fractional Rates of Change

10-3 : Modeling using the Distributive Property over Division

10-4 : Modeling More Complex Equations

Unit 11 : Linear Equations with Variables on Both Sides

11-1 : Solving Linear Equations (Type In)

11-2 : Solving with Integers (No Type In)

11-3 : Solving with Integers (Type In)

11-4 : Solving with Decimals (No Type In)

11-5 : Solving with Decimals (Type In)

11-6 : Solving with Large Decimals (No Type In)

11-7 : Solving with Large Decimals (Type In)

11-8 : Solving Linear Equations with No Solution and Infinite Solutions (No Type In)

Unit 12 : Perimeter and Area of Squares and Rectangles

12-1 : Finding Perimeter and Area of Squares and Rectangles

Unit 13 : Perimeter and Area of Parallelograms

13-1 : Finding Perimeter and Area of Parallelograms

Unit 14 : Perimeter and Area of Triangles

14-1 : Finding Perimeter and Area of Triangles

Unit 15 : Perimeter and Area of Trapezoids

15-1 : Finding Perimeter and Area of Trapezoids

Unit 16 : Circumference and Area of Circles

16-1 : Finding Circumference and Area of Circles

Unit 17 : Area Composition

17-1 : Finding Area of Composite Figures

Unit 18 : Perimeter and Area of Regular Polygons

18-1 : Finding Perimeter and Area of Regular Polygons

Unit 19 : Pythagorean Theorem

19-1 : Finding the Length of the Hypotenuse of a Right Triangle

19-2 : Finding the Length of a Leg of a Right Triangle

19-3 : Using the Pythagorean Theorem

Unit 20 : Special Right Triangles

20-1 : Finding the Lengths of Sides of a 45-45-90 Triangle

20-2 : Finding the Lengths of Sides of a 30-60-90 Triangle

Unit 21 : Right Triangles and Trigonometric Functions

21-1 : Finding Side Lengths using a Given Trigonometric Function

21-2 : Finding Side Lengths using One Trigonometric Function

21-3 : Finding Side Lengths using Multiple Trigonometric Functions

Unit 22 : Quadratic Models and Area

22-1 : Modeling Quadratic Functions as Area

Unit 23 : Quadratic Expression Factoring

23-1 : Factoring Trinomials with Positive Constants and Coefficients of One

23-2 : Factoring Trinomials with Negative Constants and Coefficients of One

23-3 : Factoring Trinomials with Positive Constants and Coefficients Other than One

23-4 : Factoring Trinomials with Negative Constants and Coefficients Other than One

23-5 : Factoring using Difference of Squares

23-6 : Factoring Quadratic Expressions

Unit 24 : Quadratic Equation Solving

24-1 : Solving Quadratic Equations

Unit 25 : Quadratic Models and Vertical Motion

25-1 : Using the Vertical Motion Model

Unit 26 : Measures of Central Tendency

26-1 : Finding Mean, Median, Mode, and Range

26-2 : Determining Appropriate Measures

26-3 : Measuring the Effects of Changing Data Sets

26-4 : Finding a Data Value Given a Mean

Unit 27 : Single Event Probability

27-1 : Finding Simple Probabilities

27-2 : Finding Disjoint Probabilities

27-3 : Finding Theoretical and Experimental Probabilities

Unit 28 : Independent and Dependent Probabilities

28-1 : Finding the Sample Space for Independent Events

28-2 : Finding the Sample Space for Dependent Events

28-3 : Finding the Sample Space for Independent and Dependent Events

28-4 : Finding Compound Probabilities

Unit 29 : Graphing Using Slope and Y-Intercept B

29-1 : Modeling with Intercepts of Zero

29-2 : Modeling with Fractional Slopes

29-3 : Modeling with Large Numbers

Unit 30 : Finding Equations of a Line

30-1 : Modeling Given Slope and a Point

30-2 : Finding Slopes

30-3 : Modeling given Two Points

30-4 : Modeling Parallel and Perpendicular Lines

30-5 : Modeling Given an Initial Point

Unit 31 : Systems of Linear Equations Modeling

31-1 : Solving Linear Systems using Integers

31-2 : Solving Linear Systems using Decimals

Unit 32 : Linear and Quadratic Transformations

32-1 : Shifting Vertically

32-2 : Reflecting and Dilating using Graphs

32-3 : Shifting Horizontally

32-4 : Transformations using Tables of Values

32-5 : Using Multiple Transformations
