Special Thanks

- The entire Carnegie Learning Production Team, with extreme gratitude for Sara Kozelnik, Julie Leath, Lindsay Ryan, Angela Cerbone, Hannah Mumm, and Emily Tope, for their patience, attention to detail, and around-the-clock hours that made the production of this textbook possible.
- David Bailis and the Westchester Education Services team for developing assessments.
- Texas Education Agency for partnering together to customize this textbook
- The SchoolKit review team for ensuring that every page in this textbook meets or exceeds the Texas Home Learning 3.0 Quality Review Rubric.

Mathematics is so much more than memorizing rules. It is learning to reason, to make connections, and to make sense of the world. We believe in Learning by Doing^(TM)—you need to actively engage with the content if you are to benefit from it. The lessons were designed to take you from your intuitive understanding of the world and build on your prior experiences to then learn new concepts. My hope is that these instructional materials help you build a deep understanding of math.

Sandy Bartle Finocchi, Chief Mathematics Officer

CMy hope is that as you work through this course, you feel capable—capable of exploring new ideas that build upon what you already know, capable of struggling through challenging problems, capable of thinking creatively about how to fix mistakes, and capable of thinking like a mathematician.

Amy Jones Lewis, Senior Director of Instructional Design

At Carnegie Learning we have created an organization whose mission and culture is defined by your success. Our passion is creating products that make sense of the world of mathematics and ignite a passion in you. Our hope is that you will enjoy our resources as much as we enjoyed creating them.

Barry Malkin, CEO

Table of Contents

Module 1: Composing and Decomposing

Topic 1: Factors and Multiples

- 1.1 Taking Apart Numbers and Shapes Writing Equivalent Expressions Using the Distributive Property
- 1.2 Searching for Common Ground Identifying Common Factors and Common Multiples
- 1.3 Composing and Decomposing Numbers Least Common Multiple and Greatest Common Factor

Topic 2: Positive Rational Numbers

- 2.1 Rocket Strips Dividing a Whole into Fractional Parts
- 2.2 Getting Closer Benchmark Fractions
- 2.3 Did You Get the Part? Multiplying Fractions
- 2.4 Yours IS to Reason Why! Fraction by Fraction Division

Topic 3: Angles and Shapes

- 3.1 Consider Every Side Constructing Triangles Given Sides
- 3.2 Turning a One-Eighty! Triangle Sum Theorem
- 3.3 All About That Base... and Height Area of Triangles and Quadrilaterals
- 3.4 Slicing and Dicing Composite Figures

Topic 4: Decimals and Volume

- 4.1 Depth, Width, and Length Deepening Understanding of Volume
- 4.2 Which Warehouse? Volume Composition and Decomposition
- 4.3 Breaking the Fourth Wall Surface Area of Rectangular Prisms and Pyramids
- 4.4 Dividend in the House Dividing Whole Numbers and Decimals

Module 2: Relating Quantities

Topic 1: Ratios

- 1.1 It's All Relative Introduction to Ratio and Ratio Reasoning
- 1.2 Going Strong! Comparing Ratios to Solve Problems
- 1.3 Oh, Yes, I Am the Muffin Man Determining Equivalent Ratios
- 1.4 A Trip to the Moon Using Tables to Represent Equivalent Ratios
- 1.5 They're Growing! Graphs of Ratios
- 1.6 One is Not Enough Using and Comparing Ratio Representations

Topic 2: Percents

- 2.1 We Are Family! Percent, Fraction, and Decimal Equivalence
- 2.2 Warming the Bench Using Estimation and Benchmark Percents
- 2.3 The Forest for the Trees Determining the Part and the Whole in Percent Problems

Topic 3: Unit Rates and Conversions

- 3.1 Many Ways to Measure Using Ratio Reasoning to Convert Units
- 3.2 What Is the Best Buy? Introduction to Unit Rates
- 3.3 Seeing Things Differently Multiple Representations of Unit Rates

Module 3: Moving Beyond Positive Quantities

Topic 1: Signed Numbers and the Four Quadrants

- 1.1 Human Number Line Introduction to Negative Numbers
- 1.2 Magnificent Magnitude Absolute Value
- 1.3 What's in a Name? Rational Number System
- 1.4 Four Is Better Than One Extending the Coordinate Plane
- 1.5 It's a Bird, It's a Plane...It's a Polygon on the Plane! Graphing Geometric Figures

Topic 2: Operating with Integers

- 2.1 Math Football Using Models to Understand Integer Addition
- 2.2 Walk the Line Adding Integers, Part I
- 2.3 Two-Color Counters Adding Integers, Part II
- 2.4 What's the Difference? Subtracting Integers
- 2.5 Equal Groups Multiplying and Dividing Integers

Topic 3: Operating with Rational Numbers

- 3.1 All Mixed Up Adding and Subtracting Rational Numbers
- 3.2 Be Rational! Quotients of Integers
- 3.3 Building a Wright Brothers' Flyer Simplifying Expressions to Solve Problems
- 3.4 Properties Schmoperties Using Number Properties to Interpret Expressions with Signed Numbers

Module 4: Determining Unknown Quantities

Topic 1: Expressions

- 1.1 Relationships Matter Evaluating Numeric Expressions
- 1.2 Into the Unknown Introduction to Algebraic Expressions
- 1.3 Second Verse, Same as the First Equivalent Expressions
- 1.4 Are They Saying the Same Thing? Verifying Equivalent Expressions
- 1.5 DVDs and Songs Using Algebraic Expressions to Analyze and Solve Problems

Topic 2: Algebraic Expressions

- 2.1 No Substitute for Hard Work Evaluating Algebraic Expressions
- 2.2 Mathematics Gymnastics Rewriting Expressions Using the Distributive Property
- 2.3 All My Xs Combining Like Terms

Topic 3: Equations and Inequalities

- 3.1 First Among Equals Reasoning with Equal Expressions
- 3.2 Bar None Solving One-Step Addition Equations
- 3.3 Play It In Reverse Solving One-Step Multiplication Equations
- 3.4 The Real Deal Solving Equations to Solve Problems
- 3.5 Greater Than Most Solving Inequalities with Inverse Operations

Topic 4: Graphing Quantitative Relationships

- 4.1 Every Graph Tells a Story Independent and Dependent Variables
- 4.2 The Power of the Horizontal Line Using Graphs to Solve Problems
- 4.3 Planes, Trains, and Paychecks Multiple Representations of Equations
- 4.4 Time for Triathlon Training Relating Distance, Rate, and Time
- 4.5 There Are Many Paths... Problem Solving on the Coordinate Plane

Topic 5: Financial Literacy: Accounts, Credit, and Careers

- 5.1 Knowledge You Can Bank On Checking Accounts
- 5.2 You Are a Real Card! Debit Cards vs. Credit Cards
- 5.3 Financial Report Card Understanding Credit Reports
- 5.4 The Possibilities Are Endless Career Exploration
- 5.5 Student Aid 101 Paying for College

Module 5: Thinking Proportionally

Topic 1: Circles and Ratio

- 1.1 Pi: The Ultimate Ratio Exploring the Ratio of Circle Circumference to Diameter
- 1.2 That's a Spicy Pizza Area of Circles
- 1.3 Circular Reasoning Solving Area and Circumference Problems

Topic 2: Fractional Rates

- 2.1 Making Punch Unit Rate Representations
- 2.2 Eggzactly! Solving Prolems with Ratios of Fractions
- 2.3 Tagging Sharks Solving Proportions Using Means and Extremes

Topic 3: Proportionality

- 3.1 How Does Your Garden Grow? Proportional Relationships
- 3.2 Complying with Title IX Constant of Proportionality
- 3.3 Fish-Inches Identifying the Constant of Proportionality in Graphs
- 3.4 Minding Your Ps and Qs Constant of Proportionality in Multiple Representations

Topic 4: Proportional Relationships

- 4.1 Markups and Markdowns Introducing Proportions to Solve Percent Problems
- 4.2 Perks of Work Calculating Tips, Commissions, and Simple Interest
- 4.3 No Taxation Without Calculation Sales Tax, Income Tax, and Fees
- 4.4 More Ups and Downs Percent Increase and Percent Decrease
- 4.5 Pound for Pound, Inch for Inch Scale and Scale Drawings

Topic 5: Financial Literacy: Interest and Budgets

- 5.1 Student Interest Simple and Compound Interest
- 5.2 Aren't Peace, Love, and Understanding Worth Anything? Net Worth Statements
- 5.3 Living Within Your Means Personal Budgets

Module 6: Describing Variability of Quantities

Topic 1: The Statistical Process

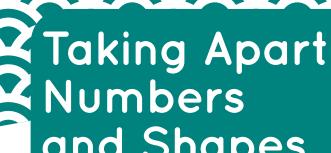

- 1.1 What's Your Question? Understanding the Statistical Process
- 1.2 Get in Shape Analyzing Numerical Data Displays
- 1.3 Follow Me on Histogram Using Histograms to Display Data

Topic 2: Numerical Summaries of Data

- 2.1 In the Middle Analyzing Data Using Measures of Center
- 2.2 Box It Up Displaying the Five-Number Summary
- 2.3 Dealing with Data Collecting, Displaying, and Analyzing Data

Glossary

Lesson Structure

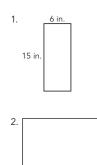

and Shapes

Writing Equivalent Expressions Using the Distributive Property

REVIEW

Calculate the area of each rectangle. Show your work.

12 yd

1 LEARNING GOALS

- Write, read, and evaluate equivalent numeric expressions. • Identify the adjacent side lengths of a rectangle as factors of the area value.
- Identify parts of an expression, such as the product and the factors.
- Write equivalent numeric expressions for the area of a rectangle by decomposing one side length into the sum of two or more numbers.
- Apply the Distributive Property to rewrite the product of two factors.

KEY TERMS

- numeric expression
- equation

9 yd

• Distributive Property

You know how to operate with numbers using different strategies. Taking apart numbers before you operate can highlight important information or make calculations easier. How can you use these strategies to express number sentences in different ways?

LESSON 1: Taking Apart Numbers and Shapes • 1

1. Learning Goals

Learning goals are stated for each lesson to help you take ownership of the learning objectives.

2. Connection

Each lesson begins with a statement connecting what you have learned with a question to ponder.

Return to this question at the end of this lesson to gauge your understanding.

3. Getting Started Each lesson begins with a Getting Started. When working on the Getting Started, use what you know about the world, what you have learned previously, or your intuition. The goal is just to get you thinking and ready for what's to come.	3 Cetting Storted
	2 • TOPIC 1: Factors and Multiples

	5 × 27 represents the area of the walkway numeric expression is a mathematical rs and operations.	
The equation $5 \times 27 = 135$ equal to the expression 135	shows that the expression 5 \times 27 is .	What are other ways
•	ical sentence that uses an equals sign to tities are the same as one another.	you could split one of the factors
	ways you can rewrite the product of your area models to complete the	and write a corresponding equation? What would
How did you split the sic length of 27?	le 5 × 27 = 5(+)	the equation look like if you split one of the factors into more
What are the factors of e smaller region?	ach = (5 ·) + (5 ·)	than two regions?
What is the area of each smaller region?	= +	
What is the total area?	=	

4. Activities

You are going to build a deep understanding of mathematics through a variety of activities in an environment where collaboration and conversations are important and expected.

You will learn how to solve new problems, but you will also learn why those strategies work and how they are connected to other strategies you already know.

Remember:

- It's not just about answer-getting. The process is important.
- Making mistakes is a critical part of learning, so take risks.
- There is often more than one way to solve a problem.

Activities may include real-world problems, sorting activities, Worked Examples, or analyzing sample student work.

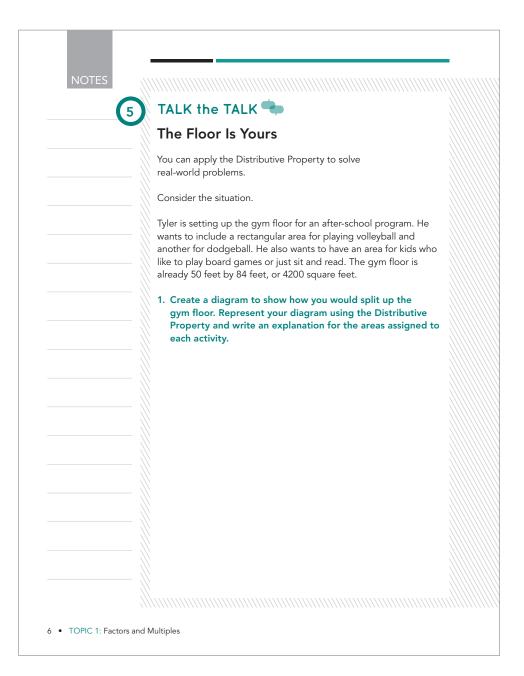

Be prepared to share your solutions and methods with your classmates.

5. Talk the Talk

Talk the Talk gives you an opportunity to reflect on the main ideas of the lesson.

- Be honest with yourself.
- Ask questions to clarify anything you don't understand.
- Show what you know!

Don't forget to revisit the question posed on the lesson opening page to gauge your understanding.

Assignment

Assignment	LESSON 1: Taking Apart Numbers and Shapes
Write Explain the Distributive Property in terms of composing and decomposing numbers.	Remember There are many ways to rewrite equivalent expressions using properties. The Distributive Property of Multiplication over Addition states that for any numbers a, b, and c, a(b + c) = ab + ac.
	o or three smaller rectangles to demonstrate e each area in the form $a(b + c) = ab + ac$.
1	
	Evaluate each expression using the Distributive Property. Show your work. 4. $6(12 + 4)$ 5. $10 + 4(2 + 20)$ 6. $7(4 + 19)$
3. <u></u> 6	Stretch 9 Decompose each rectangle into smaller rectangles to demonstrate the Distributive Property. Write each area in the form $a(b + c) = ab + ac$ and then determine the total area. 1
	Review 10 Calculate the area of each rectangle.
	1. Width = 5 feet2. Width = 10 feetLength = $\frac{2}{3}$ footLength = $\frac{2}{3}$ foot3. Width = 15 inches4. Width = 20 inchesLength = $\frac{2}{3}$ inchLength = $\frac{2}{3}$ inch

6. Write

Reflect on your work and clarify your thinking.

7. Remember

Take note of the key concepts from the lesson.

8. Practice

Use the concepts learned in the lesson to solve problems.

9. Stretch Ready for a challenge?

10. Review

Remember what you've learned by practicing concepts from previous lessons and topics.

Problem Types You Will See

Worked Example

WORKED EXAMPLE

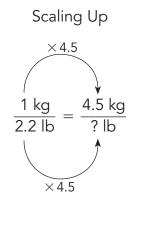

4.5 kilograms.

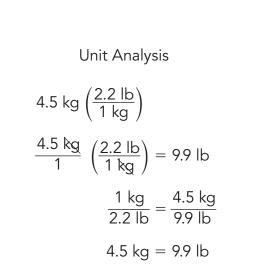

- Take your time to read through it.
- Question your own understanding.
- Think about the connections between steps.

Ask Yourself:

- What is the main idea?
- How would this work if I changed the numbers?
- Have I used these strategies before?

Christopher and Max want to determine the number of miles in 31,680 feet using unit analysis.

Thumbs Up

Determine the quantity in pounds that is equivalent to

When you see a Thumbs Up icon:

- Take your time to read through the correct solution.
- Think about the connections between steps.

Ask Yourself:

- Why is this method correct?
- Have I used this method before?

Thumbs Down

When you see a Thumbs Down icon:

- Take your time to read through the incorrect solution.
- Think about what error was made.

Ask Yourself:

- Where is the error?
- Why is it an error?
- How can I correct it?

Tim and Dan love cereal, but don't want spend a lot of money. After scanning the aisle in the grocery store for the lowest prices, the boys make the following statements.

- Tim says, "I found Sweetie Oat Puffs for \$0.14 per ounce. That's the cheapest cereal in the aisle!"
- Dan replies, "It's not cheaper than Sugar Hoops! The unit price for that is 6.25 oz per dollar."

Who is correct? Explain your reasoning.

Who's Correct

When you see a Who's Correct icon:

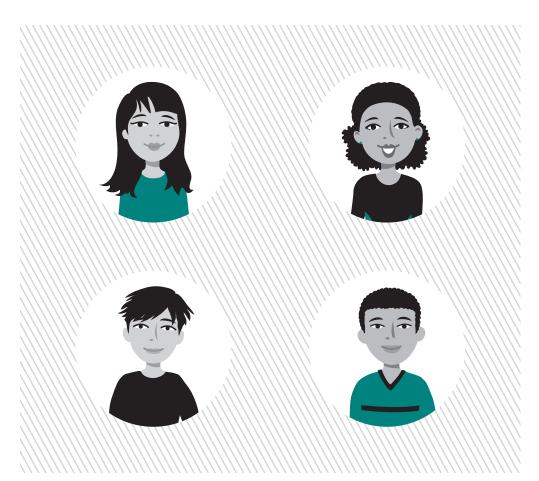

- Take your time to read through the situation.
- Question the strategy or reason given.
- Determine correct or not correct.

Ask Yourself:

- Does the reasoning make sense?
- If the reasoning makes sense, what is the justification?
- If the reasoning does not make sense, what error was made?

The Crew

The Crew is here to help you on your journey. Sometimes they will remind you about things you already learned. Sometimes they will ask you questions to help you think about different strategies. Sometimes they will share fun facts. They are members of your group—someone you can rely on!

Teacher aides will guide you along your journey. They will help you make connections and remind you to think about the details.

Texas Mathematical Process Standards

Effective communication and collaboration are essential skills of a successful learner. With practice, you can develop the habits of mind of a productive mathematical thinker. The "I can" expectations listed below align with the TEKS Mathematical Process Standards and encourage students to develop their mathematical learning and understanding.

Apply mathematics to problems arising in everyday life, society, and the workplace.

I can:

- use the mathematics that I learn to solve real world problems.
- interpret mathematical results in the contexts of a variety of problem situations.
- Use a problem-solving model that incorporates analyzing given information, formulating a plan or strategy, determining a solution, justifying a solution, and evaluating the problem solving process and reasonableness of the solution.

I can:

- explain what a problem "means" in my own words.
- create a plan and change it if necessary.
- ask useful questions in an attempt to understand the problem.
- explain my reasoning and defend my solution.
- reflect on whether my results make sense.

Select tools, including real objects, manipulatives, paper and pencil, and technology as appropriate; and techniques including mental math, estimation, and number sense as appropriate, to solve problems.

l can:

- use a variety of different tools that I have to solve problems.
- recognize when a tool that I have to solve problems might be helpful and when it has limitations.
- look for efficient methods to solve problems.
- estimate before I begin calculations to inform my reasoning.

Communicate mathematical ideas, reasoning, and their implications using multiple representations including symbols, diagrams, graphs, and language as appropriate.

I can:

- communicate and defend my own mathematical understanding using examples, models, or diagrams.
- use appropriate mathematical vocabulary in communicating mathematical ideas.
- make generalizations based on results.
- apply mathematical ideas to solve problems.
- interpret my results in terms of various problem situations.

Create and use representations to organize, record, and communicate mathematical ideas.

l can:

- consider the units of measure involved in a problem.
- label diagrams and figures appropriately to clarify the meaning of different representations.
- create an understandable representation of a problem situation.

Analyze mathematical relationships to connect and communicate mathematical ideas.

I can:

- identify important relationships in a problem situation.
- use what I know to solve new problems.
- analyze and organize information.
- look closely to identify patterns or structure
- look for general methods and more efficient ways to solve problems.
- Display, explain, and justify mathematical ideas and arguments using precise mathematical language in written or oral communication.

l can:

- work carefully and check my work.
- distinguish correct reasoning from reasoning that is flawed.
- use appropriate mathematical vocabulary when I talk with my classmates, my teacher, and others.
- specify the appropriate units of measure when I explain my reasoning.
- calculate accurately and communicate precisely to others.

Academic Glossary

Visit the Students & Caregivers Portal on the Texas Support Center at www. CarnegieLearning.com/ texas-help to access the Mathematics Glossary for this course anytime,

anywhere.

There are important terms you will encounter throughout this book. It is important that you have an understanding of these words as you get started on your journey through the mathematical concepts. Knowing what is meant by these terms and using these terms will help you think, reason, and communicate your ideas.

Related Phrases

Evaluate

Examine

- Determine
- Observe
- Consider
- Investigate
- What do you notice?
- What do you think?
- Sort and match

Definition

ANALYZE

To study or look closely for patterns. Analyzing can involve examining or breaking a concept down into smaller parts to gain a better understanding of it.

Ask Yourself

- Do I see any patterns?
- Have I seen something like this before?
- What happens if the shape, representation, or numbers change?

Related Phrases

- Show your work
- Explain your calculation
- Justify
- Why or why not?

EXPLAIN YOUR REASONING

Definition

To give details or describe how to determine an answer or solution. Explaining your reasoning helps justify conclusions.

Ask Yourself

- How should I organize my thoughts?
- Is my explanation logical?
- Does my reasoning make sense?
- How can I justify my answer to others?

REPRESENT

Definition

To display information in various ways. Representing mathematics can be done using words, tables, graphs, or symbols.

Ask Yourself

- How should I organize my thoughts?
- How do I use this model to show a concept or idea?
- What does this representation tell me?
- Is my representation accurate?

ESTIMATE

Definition

To make an educated guess based on the analysis of given data. Estimating first helps inform reasoning.

Ask Yourself

- Does my reasoning make sense?
- Is my solution close to my estimation?

DESCRIBE

Definition

To represent or give an account of in words. Describing communicates mathematical ideas to others.

Ask Yourself

- How should I organize my thoughts?
- Is my explanation logical?
- Did I consider the context of the situation?
- Does my reasoning make sense?

Related Phrases

- Show
- Sketch
- Draw
- Create
- Plot
- Graph
- Write an equation
- Complete the table

Related Phrases

- Predict
- Approximate
- Expect
- About how much?

Related Phrases

- Demonstrate
- Label
- Display
- Compare
- Determine
- Define
- What are the advantages?
- What are the disadvantages?
- What is similar?
- What is different?
